

TRANSLYFT - your partner in lifting

Lifting tables/equipment is a necessary help in the daily routines for many companies, both to increase the efficiency but also to prevent risks of injuries during work for the employees. Through our many years of experience TRANSLYFT has constructed and manufactured lifting scissor lifts for many different situations and purpose and we offer a wide variety from standard scissor lifts to comprehensive bespoke lifting solutions.

Lifting tables from TRANSLYFT can be integrated as a part of a conveyor line and in automated handling systems.

TRANSLYFT loading bays and goods lifts are being used between levels or floors or for cross docking purpose.

Lifting tables are being used in many work processes and situations: For example palletizing and depalletizing.
