Explosion proof scissor lifts

Translyft Ergo A/S is the leading name in lifting solutions also for bespoke solutions for lifting equipment operating in potentially explosive atmospheres.

We are one of the few companies within the line of lifting equipment who has been certified to develop, construct and manufacture lifting equipment for installation in the various safety zones according to the ATEX regulation.

Explosion proof lifting equipment must be installed in e.g.:

- * dusty environments - wood and metal industries
- * areas with explosive liquids
- * chemical and pharmaceutical industries
- * refineries and oil rigs
- * paint cabins/workshops
