TRANSLYFT GOODS LIFT

Transport of goods from for example one level to another level, from one place to another place, from warehouse to conveyor, from truck to store can be done easier and more ergonomic with a goods lift from TRANSLYFT.

All TRANSLYFT goods lifts can be mounted with hand rails, gates, shielding of scissor etc. and can be constructed exactly according to your needs so we end up with the best solution for you.

Below we show 3 examples of smaller goods lift for your inspiration:

Scissor lift installed outside a school in London to be used as both handicap lift and goods lift. Based on a TMD lifting table, 1850 x 1350 mm, capacity 700 kg, travel 2150 mm.

TB 1000 installed as a combined person/goods lift at a hospital. Top plate is 1700 x 1200, travel 1000 mm and capacity of 500 kg

Goods lift installed at a public institution. It is type TB 1000 which is used, top plate is 1500 x 800, capacity 1000 kg and travel 880 mm
