

TRANSLYFT lifting table, type TLG 1200

TRANSLYFT has constructed a new type of lifting table with low loading height and for mounting on the floor, so establishment of pit can be avoided and in case it is necessary to move the table, this is easily done.

The TLG has following advantages:

- * Easy access of pallets with pallet lifter or truck due to low loading height
- * Solid and reliable construction with big capacity
- * Can be delivered with driven or undriven roller conveyor
- * No need for establishing of pit
- * Low installation costs
- * Can be delivered in painted steel, galvanised steel and stainless steel
- * Flexible solution

Technical information: type TLG 1200

Lifting cap.: 1200 kg

Closed height over scissor: 250 mm

Travel: 720 mm

Closed height over roller conveyor: 65 mm

Lenght: 1500 mm

Loading width: 1100 mm

Max. height over roller conveyor: 785 mm

External width: 1900 mm

We wish you all a pleasant summer
