

TRANSLYFT continue our collaboration with TÜV

As part of TRANSLYFT's strategy to produce lifting tables of the highest quality, with quality certificate to prove this, we are continuing our collaboration with German TÜV.

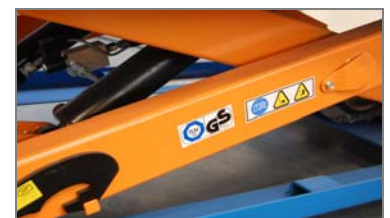

To maintain our position as a leading manufacture of lifting tables, safety and quality is very important to TRANSLYFT. An inspector from TÜV visits annually to ensure that the lifting tables are being constructed and produced exactly in accordance with the EN 1570 regulations, fulfilling both our safety and quality assurances.

Production manager Michael Muff Jensen with the renewed TÜV-certificate

All standard lifting tables are marked with TÜV labels as a guarantee that the construction is made according to EN 1570.

TRANSLYFT also continues to manufacture many bespoke solutions, which are constructed in accordance with TÜV and EN 1570 when possible.
